1 Purpose

This documentation keens on how to port function key in the CMPC Debian 8.1 OpenSource Kits, to a Debian 8.1 compliant OS distro. Hopefully the following discussion could help developers do porting work with minimum effort.

If your development environment is NOT Debian 8.1 compliant, then please check "Dependency" section.

2 Scope

The documentation shows the package porting work step by step. It covers the image porting environment setup, dependency and the feature list to be verified.

3 Environment Setup

3.1 Development Environment

This package is developed on Debian 8.1 image. So it could be ported to any Linux distribution which is complaint with Debian 8.1.

The development environment we use is as followings:

Linux OS	Debian 8.1
Kernel Version	3.16.0-4-amd64
Hardware Platform	Pinetree Peak Refresh

3.2 Dependencies

The function key package depends on the following components:

Dependency	Deb Package	Description
Gtk2	libgtk2.0-dev	Gtk+ develop library
XTST	libxtst-dev	X11 Testing library
git	git	tool for download RDK
dbus	libdbus-1-dev	dbus library
dbus-glib	libdbus-glib-1-dev	dbus-glib library
automake	automake	Tool for make file

1. execute "apt-get update" using root authority after edited the /etc/apt/sources.list

   $ su

   # cp /etc/apt/sources.list /etc/apt/sources.list.backup

   # echo 'deb http://ftp.debian.org/debian/ jessie main' > /etc/apt/sources.list

   # echo 'deb-src http://ftp.debian.org/debian jessie main' >> /etc/apt/sources.list

   # apt-get update

2. Using "apt-get install <package-name>" with root authority to install packages you want.
3. apt-get install linux-headers-$(uname -r)

3.3 Get Source code

git clone https://github.com/empglinux/rdk.git
cd rdk
git checkout –b ptpr-debian8.1 origin/ptpr-debian8.1

3.4 Source code

If this package you get is source code tar ball, then extract it like this:
$ su root
# cd rdk

4 Function Key Package Porting

4.1 Files Description

There are some main files in the package:

cmpc_pm.c
Driver to control brightness and WLAN

cmpc_vkd.c
Driver to fetch key strokes

fnkey.cpp
Function Key daemon

OnScrDsp.cpp
OSD controlling

accel.c
Driver to provide G-sensor data

iscm_new.c
Driver to provide data to TD

4.2 Build && Install

4.2.1 Build && Install RDK Drivers

$ su root
# cd rdk/rdk-drivers/
# make
# depmod –a
#reboot

4.2.2 Build && Install RDK Application

$ su root
# cd rdk/functionkeys/
# chmod 777 autogen.sh
# ./autogen.sh
# make install
# reboot

4.2.3 Compile sensord under sensord directory

$ su root

#cd sensord/

#make

#make install

#reboot

4.3 Files List

fnkey.cpp:

Main source code of fnkey functionality

OnScrDsp.cpp:

OSD related code

OnScrDsp.h:

OSD related header

button.h:

fnkey header

cmpc_pm.h:

ioctl command definition file
